

*Sub B2*

18. (Amended) The plastic molding according to claim 17, wherein at least one of the

plurality of imperfect transfer portions is formed in a portion other than the transfer surface.

19. (Amended) The plastic molding according to claim 18, wherein at least one of the

plurality of imperfect transfer portions is formed in an adjacent surface of the transfer  
surface.

20. (Amended) The plastic molding according to claim 18, wherein at least one of the

plurality of imperfect transfer portions is formed so as to have a contour disposed apart from  
an edge of the transfer surface.

21. (Amended) A plastic molding comprising:

a transfer surface;

at least one imperfect transfer portion having a concave or convex shape, wherein the  
imperfect transfer portion is located in at least one prescribed portion of the plastic molding  
so as to release a residual resin-pressure and an inward deformation of the plastic molding,  
the imperfect transfer portion is formed in a portion other than the transfer surface, and the  
imperfect transfer portion is formed so as to have a contour disposed apart from an edge of  
the transfer surface; and

a second transfer surface, wherein the imperfect transfer portion is formed in a portion  
between the transfer surface and the second transfer surface so as to have a contour disposed  
apart from edges of both the transfer surface and the second transfer surface.

*A  
Amend*

22. (Amended) The plastic molding according to claim 17, wherein at least one of the plurality of imperfect transfer portions is formed in a portion having a thickness less than a maximum thickness of the plastic molding.

23. (Amended) The plastic molding according to claim 17, wherein the plurality of imperfect transfer portions comprises two imperfect transfer portions, wherein both imperfect transfer portions are formed in a same surface other than the transfer surface.

24. (Amended) The plastic molding according to claim 17, wherein the plastic molding is an optical element.
